# THE ROAD TO RECOVERY STARTS HERE

## L7 & L8 REHAB TREADMILLS

Made with the finest materials, the L7 and L8 Rehabilitation Treadmills provide the best and safest support for all your rehabilitative programs. With a low step-up height, zero starting speed, 300 micro-amp isolation leakage kit and extended parallel medical handrails, these treadmills are ideal for any physical therapy and sports conditioning center. A number of unique options are also available, such as a reversing treadbelt for downhill walking, 100 micro-amp hospital isolation leakage kit, and an orthopedic suspension system. For a complete list of options please visit us at [Landice.com](http://Landice.com).

### R9 / U9 BIKES

The Landice R9 & U9 bikes offer a comfortable and safe rehabilitation option. The wide step-through design on the R9 allows for easy access along with superior back support. The U9 offers well-cushioned seating with adjustable height levels to support a personalized lower-body rehabilitation regimen.

## NATURAL BIOMECHANICS - LOW IMPACT

### E9 ELLIPTICAL TRAINER

Patients at any athletic level from beginner to professional will find physical benefits and rehabilitative functionality on a Landice.

The E9 offers one of the only fitness units that enables both upper and lower body exercise capabilities. Patients can stand upright on the frame's stationary footpads and perform an isolated workout to strengthen the upper body. This back-and-forth motion is considered a preferable position as opposed to a seated rotational movement.

For the lower body, the center-drive technology replicates the biomechanics of walking or running. The E9 provides a low impact alternative to treadmills.

The elliptical also features an accessible, safe, stable and patient-friendly exercise platform. Users can easily grab the side rails, step-up and safely start a workout. The pedals will move only when the patient engages the upper body handrails and/or foot pedals.

### E9 ELLIPTICAL FEATURES

<b>User Capacity</b>	500 lbs.	<b>Stride Length</b>	Adjustable 17" - 23"
<b>Active Footprint</b>	35" W x 76" L x 67" H	<b>Drive System</b>	Center Drive
