

CLM 835 Climber EXPERIENCE® SERIES

Like every piece of equipment in our Experience® Series 830 Line, the CLM 835 combines essential reliability and ease-of-use with a smooth feel and quiet movement to add value to your facility. With low-maintenance design and extreme durability, the CLM 835 climber uses the same low-friction, self-powered generator system as the Precor Elliptical Fitness Crosstrainers.

The P30 console complements the line through form and function, with easy-to-use motion controls, an LED display with essential workout stats to keep exercisers moving, and a mobile device charger.

At Precor, we recognise that a great workout is the sum of many parts. In your hands, the products, services, and technologies we offer can be combined in countless ways to complement the programs and atmosphere you're creating.

CLM 835 Climber

EXPERIENCE® SERIES

Product Features

1. Heart Rate Monitoring

Touch and telemetry heart rate monitoring instantly analyses an exerciser's heart rate, helping users stay in their fat burn, cardio, or peak target zone for a more efficient cardio and weight-loss workout.

2. Console

The P30 console features easy-to-use motion controls and an LED display that focuses on the essential fitness stats to keep users informed and engaged. Add an optional Entertainment Cap to provide access to a selection of audio channels, including those from wall or ceiling-mounted displays, or a Personal Viewing System (PVS) to give exercisers a more personal entertainment experience, with total choice and control.

3. Handrails

U-shaped handrails encourage good posture and proper technique.

4. Pulley-drive System

Pulley-drive systems are inherently dependable because they tend to have fewer parts. Pulleys do not require lubrication like chains and won't stretch like cables.

Refined colourways with dark Tungsten covers and two frame colour options.

Gloss Metallic Silver Frame

Black Pearl Frame

Optional wireless entertainment cap

P30 Console

P30 Console with optional 15.6 in / 39.6 cm Personal Viewing System
